EXPERIENCE

Frontend Developer

Robotixx Services Pvt.Ltd

 03/2025 - Current

 Noida, India

- Developed reusable services and components and integrated third-party APIs into Angular 16 applications, promoting a modular, scalable architecture while enhancing functionality and user interaction.
- Built dynamic, validated user interfaces using both Angular reactive forms and template-driven forms, ensuring accurate and seamless user input handling.
- Implemented real-time location features, integrating live and current location tracking through the browser's Geolocation API to enhance interactive user experiences.
- Created route guards and HTTP interceptors to manage secure access control, API request modification, and error handling across the Angular app.
- Configured token-based authentication and secured frontend-backend communication through custom logic for encryption and session validation.
- Optimized application performance by applying Angular's lazy loading, module splitting, image compression, and browser caching strategies.
- Debugged complex API integration and logic issues using Chrome DevTools and Angular Debugging Tools, improving development efficiency and reliability.
- Collaborated with backend developers to define API structures, handle error responses, and manage smooth data flow across the application.
- Implemented low-level asynchronous encryption techniques to secure sensitive frontend data and maintain compliance with privacy standards.

Junior Developer

AlgoGenix Pvt.Ltd

 10/2023 - 12/2024

 Noida, India

- Contributed to backend development by designing efficient, well-structured APIs and ensuring their seamless integration with Angular front-end applications for enhanced functionality and performance.
- Developed scalable Angular components, services, and modules to optimize application performance, maintainability, and modular architecture across large-scale projects.
- Utilized advanced RxJS techniques and Observables to handle asynchronous data streams effectively, significantly improving application responsiveness and real-time user experience.
- Leveraged TypeScript features to enforce strict typing, adhere to object-oriented programming principles, and enhance overall code quality, maintainability, and bug reduction.
- Integrated RESTful APIs within Angular applications, ensuring secure and efficient data exchange between client and server while adhering to best practices in state management and HTTP communication.
- Collaborated with UX/UI designers to transform visual design mockups into fully functional and reusable web components using Angular Material, ensuring a consistent and intuitive user interface.
- Worked in cross-functional teams, actively communicating with developers, QA, and product stakeholders to convert business requirements and user journeys into responsive, high-performance web solutions.
- Conducted thorough code reviews, identified performance bottlenecks, and implemented optimizations to ensure high-quality, scalable, and maintainable software aligned with industry standards.

SUMMARY

Innovative Front-End Developer with expertise in AngularJS and a proven track record of delivering user-friendly, scalable web applications. Skilled in leveraging Angular's powerful framework to write clean, maintainable, and efficient code. Adopt at collaborating with cross-functional teams to deliver high-quality software solutions that align with user requirements and business goals. Passionate about creating intuitive and seamless user experiences, with a strong foundation in front-end development and modern web technologies. Continuously driven to stay updated with emerging trends and advancements in web development to deliver innovative solutions that exceed client expectations

SKILLS

UI/UX Optimization		SEO
AngularJS		Google Analytics
Debugging	Bootstrap	OOP
TypeScript	GitHub	CSS
Wordpress	Front-end	Git
RESTful API Integration		XML
Github	HTML 5	Code Review
Performance Tools		Json
Component Development		DOM
MySQL	SPA Dev	Redux
Google Tag Manager		Teamwork
Adaptability		Critical-Thinking
Javascript	NextJS	React

EXPERIENCE

Software Engineer Trainee

Enthuons Technologies Pvt.Ltd

04/2021 - 06/2022 Noida, India

- Conducted technical SEO audits and implemented recommendations to improve website structure, speed, and accessibility, aligning with best practices and search engine algorithms.
- Monitored SEO performance using tools like Google Analytics, Search Console, and SEMrush to identify trends, track KPIs, and make data-driven strategy adjustments.
- Performed keyword research and executed on-page/off-page SEO strategies, leading to higher organic rankings and traffic growth.
- Applied schema markup and structured data to enhance SERP listings, improving visibility, click-through rates, and audience targeting.
- Designed and developed responsive websites using PHP, JavaScript, HTML, and CSS, ensuring cross-browser compatibility and smooth user experience.
- Collaborated with cross-functional teams to align SEO strategies with user-centric design and high-quality content for improved visibility and satisfaction.
- Implemented performance optimization techniques such as image compression, lazy loading, and browser caching to enhance site speed and user engagement.

INTERN

Innotical Solutions

06/2020 - 07/2020 Noida, India

- Utilized version control systems like Git for code management, facilitating team collaboration and maintaining a comprehensive project history.
- Assisted in the development of user interfaces using HTML, CSS, and JavaScript, enhancing website accessibility, aesthetics, and overall responsiveness.
- Conducted thorough testing and debugging of new software features, significantly reducing the number of reported issues by users and improving system reliability.
- Participated in workshops and seminars on software development trends, applying newly acquired knowledge to ongoing projects and proposing innovative solutions for process improvements.
- Assisted in the configuration and management of cloud-based environments, optimizing resources, automating deployment pipelines, and reducing operational costs.

INTERN

Wipro Limited

06/2019 - 07/2019 Noida, India

- Maintained and updated website content, ensuring accurate and current information was displayed to users while optimizing content for better visibility and engagement.
- Assisted in the development of user interfaces for software applications, employing best practices in UI and UX design to enhance usability and accessibility for a diverse user base.
- Conducted usability testing and gathered feedback to refine interface designs, ensuring they met both user and business requirements.
- Assisted in the deployment of software applications to production environments, monitoring performance, troubleshooting issues, and implementing fixes to ensure seamless functionality.
- Partnered with engineering staff to identify and resolve interface issues, improving system reliability and user experience.
- Documented updates, testing outcomes, and deployment processes to support team knowledge sharing and future project efficiency.

Achievements and Awards

Winner, SmartIndiaHackathon(SIH) 2020
Organized by the **Government of India.**

Finale Participant, Smart India Hackathon (SIH) 2019
Organized by the **Government of India.**

Winner, Reverse Coding Competition
Held at **Teerthanker Mahavir University.**

Winner, ProgramminginC(Samagra 2019)
Organized by **ITS, Ghaziabad.**

Participant, TechnovationHackathon 2020
Conducted by **Sharda University, Noida.**

Completed 'Managing Self' Course
Part of the **Soft Skills for Professionalism Program** conducted by the **Centre for Teaching, Learning, and Development.**

Completed Aptitude Course
Conducted by the **Centre for Teaching, Learning, and Development.**

PROJECTS

SafeWheel Parent

Developed the entire front-end of the SafeWheel Parent website, focusing on creating a responsive and user-friendly interface. Managed the integration of APIs, handled routing, and ensured seamless navigation across the site. Utilized technologies like HTML, CSS, JavaScript, and Angular to bring the design to life, ensuring smooth functionality and an intuitive user experience. The project improved my skills in front-end development and API integration while delivering a high-quality web application.

Aap Ka Bazar

Recreated the AapkaBazar website as a personal project to practice and refine web development skills. The project involved duplicating the design and functionality of the original website, which was developed by the company, to enhance proficiency in front-end development. Focused on creating a responsive and user-friendly design using HTML, CSS, Bootstrap, and Angular. This exercise helped improve skills in modern web technologies and ensured cross-device compatibility.

Farmer Assistant

This is Web Application Developed for **Government of Bihar** to provide a crop recommendation system based on soil type and weather conditions. The application features a user-friendly interface, enabling farmers to access essential resources effortlessly. Designed to enhance decision-making and resource management efficiency, the project empowers farmers with actionable insights for better agricultural practices. Technologies used include HTML, CSS, and PHP.

Efficiency Monitoring

Developed a web application to evaluate and monitor the efficiency of various branches within an industry. The application identifies the reasons behind low efficiency in specific branches and provides feedback along with actionable solutions to improve performance by analyzing historical data. It also collects feedback from employees across branches to ensure continuous improvement and better decision-making. The system helps in optimizing workflow and performance. Technologies used: HTML, CSS, and Dotnet..
